

VENEER MOISTURE METER

DS7-AL

Veneer moisture meter

- optimised for veneers
- name of the veneer is displayed in different languages
- 30 different calibration curves for veneers already implemented
- with lower case part made of aluminium for better protection against mechanical and electrostatical strength
- it can be tested and calibrated with the optional calibration module type PE30-7

Technical data:

measuring range:	0 - 20% (adjustable)
resolution:	0,1%
measuring depth:	approx. 1 cm
measuring frequency:	1 -10 meas. / sec (adjustable)
attenuation:	0 - 99% (adjustable)
dimension:	approx. 180 x 80 x 40 mm
weight:	approx. 420 g
interface:	RS232 / DS7-Controller

Optional extras:

serial interface cable (RS232)

USB - R232 adapter

PC software DMI-Controller

test module PE30-7

lithium long life bat., 30h measuring time
